ATIS 2019

International Conference on Applications and Techniques in Information Security
SASTRA Deemed University, Tamil Nadu, India
November 22-24, 2019

WELCOME TO ATIS 2019

The 2019 International Conference on Applications and Technologies in Information Security (ATIS), will be the tenth (10th) event in the ATIS series, which started in 2010. The purpose of ATIS is to provide a forum for presentation and discussion of innovative ideas, research results, applications and experience from around the world. The annual ATIS conference highlights new results in the design and analysis of digital security hardware and software implementations. ATIS provides a valuable connection between the theoretical and implementation communities and attracts participants from industry, academia, and government organisations.

As academic research in information security has developed over the last twenty or so years, applications and techniques are being developed to be of specific use in this area. These include wavelets and their applications in digital forensics, classification algorithms for use in malicious software detection, and genetic algorithms custom-made for the cryptographic community, etc. ATIS 2019 focuses on all aspects on techniques and applications in information security. Accepted papers will appear in the proceedings to be published as Springer's Communications in Computer and Information Science Series (EI-indexed). ATIS 2019 CCIS Volume will be systematically submitted by Springer to various indexing services, including EI-Compendex, Scopus, SCImago, DBLP, Google Scholar, etc.

KEY DATES

Paper Submission	**11/07/2019**
Acceptance / Rejection Notification	04/08/2019
Revised Manuscript Submission	14/08/2019
Camera Ready and Author Registration due	31/08/2019

SPONSORSHIP

KEYNOTES

Prof. V. Kamakoti,

Professor, IIT Madras,

Chennai,

India

Prof. Aditya P. Mathur,

Professor Emeritus of

Computer Science,

Purdue University, West

Lafayette, IN, USA

Professor and Center

Director,

iTrust and National Satellite

of Excellence (DeST-SCI),

SUTD, Singapore

Prof. Kasi Periyasamy,

Professor and MSE Program

Director,

University of Wisconsin-La

Crosse,

Wisconsin, USA

Dr. Lejla Batina ,

Professor in Digital Security,

Institute for Computing and

Information Sciences,

Radboud University, The

Netherlands

ITSecurity Research

Department of Science and Technology
Ministry of Science and Technology
Government of India

PUBLICATION
